## EXPERIENCE

---

Sense/Net Inc. – Front-end developer, UI Engineer  
2010 - present

**My main tasks at Sense/Net for all my projects were to do front-end developments using Sense/Net ECMS and to train clients on how to use it and our custom software and solutions**

### **FHB Commercial Bank**

*One of the largest banks in Hungary with internet, intranet and several extranet sites.*

[www.fhb.hu](http://www.fhb.hu)  
[fhbpartner.fhb.hu](http://fhbpartner.fhb.hu)  
intranet

In addition to front-end work and training, I also helped plan and implement the infrastructure. The aim was to create an easy-to-use portal using the “one system” concept that holds their internet, intranet and microsites

### **Hungary Initiatives Foundation**

*A non-profit organization based in the USA with website and mobile site as well*

[hungaryfoundation.org](http://hungaryfoundation.org)

I built a responsive site using Twitter Bootstrap and custom font types. For sending newsletters, I also integrated the custom email build of the portal with MailChimp

### **Deal Interactive 9.0**

*Virtual data room for Transperfect  
(still in development)*

I participated in designing the whole UX; from wireframes to UI implementation. The interface is built entirely using Kendo UI, JavaScript templates and is fully AJAX-driven

### **Vertech and SILXChange**

*Software for the glass manufacturing industry worldwide*

[www.vertech.fr](http://www.vertech.fr)

My task was to design and create a sleek UI and integrate it into a multi-lingual system for the glass manufacturing industry

### **State Motorway - E-Vignette**

*Online customer service and vignette purchasing site for the State Motorway Management Co. Ltd.*

[ematrica.autopalya.hu](http://ematrica.autopalya.hu)

I took part in the UX design and created the printable e-vignettes for this high-traffic customer service portal / webshop

### **Hungarian State Motorway mobile version**

*Hungarian motorway company mobile version*

[www.toll-charge.hu](http://www.toll-charge.hu)

Mobile-optimized version of the portal which I designed and built with jQuery Mobile

### **Tigáz (ENI Group)**

*Hungarian energy company based in Italy*

[www.tigaz.hu](http://www.tigaz.hu)  
[m.tigaz.hu](http://m.tigaz.hu)

I built the desktop and mobile site according to the public appearance guidelines of the brand, including many webforms

Active Vision Ltd. – Site builder  
2008 – 2010

**At Active Vision I developed custom solutions built on the SIWWWA CMS, mainly focusing on front-end work and mobile optimization**

**Telekom (T-System)**

*The largest Hungarian telecommunications company owned by Deutsche Telekom*  
[www.telekom.hu](http://www.telekom.hu)

I created the website to match the brand image and integrated it into a CMS for which I also created a content editing UI

**T-Home (Hungarian Telekom)**

*Telekom brand site entertaining services including internet, television and telephone*  
[www.t-home.hu](http://www.t-home.hu)

Merged three sites into one main brand site during a fast-paced project. We used XML and XPath for building the UI

**Allianz Insurance**

*One of the largest general insurers in the world and part of the Allianz Group*  
[www.allianz.hu](http://www.allianz.hu)

We created an information-centered site and integrated it into a CMS. Also built a custom WYSIWYG editor for them

**AXA Hungary**

*The biggest insurance and healthcare company in the world*  
[www.axa.hu](http://www.axa.hu)

The main goal of this site was to introduce their products and incorporate their brand image. We used custom fonts and flash

**OTP Portal**

*The largest Hungarian bank with millions of clients*  
[www.otpbank.hu](http://www.otpbank.hu)

I participated in implementing the whole banking UI which includes lots of forms, from starting your bank account to searching for ATMs

**OTP Portal mobile version**

*OTP national bank site in mobile version*  
[www.otpbank.hu/portal/m\\_index.jsp](http://www.otpbank.hu/portal/m_index.jsp)

I was responsible for news and some applications, for example: bank locator, account balance, etc. The whole mobile version has its own dedicated UI for editing content

**EDUCATION**

2002-2007 BScEd Teacher of informatics - University of Szeged  
2002-2006 BSE Cultural Manager - University of Szeged

**SKILLS**

HTML 5, CSS 3
